Top 150+ Projects for Final Year CS Students- part-2

1. AI Agents & Agentic Systems (15 Projects)

1. **Autonomous Code Review Agent** - https://github.com/topics/code-review-automation
2. **Multi-Agent Task Automation System** - https://github.com/microsoft/autogen
3. **AI Sales Assistant Agent** - https://github.com/langchain-ai/langgraph
4. **Customer Support Agent with Memory** - https://github.com/run-llama/llama_index
5. **Research Assistant Agent** - https://github.com/assafelovic/gpt-researcher
6. **AI Data Analyst Agent** - https://github.com/topics/ai-data-analyst
7. **Personal Finance Planning Agent** - https://github.com/topics/ai-assistant
8. **Content Creation & SEO Agent** - https://github.com/topics/content-generation
9. **Automated Bug Fixing Agent** - https://github.com/topics/automated-debugging
10. **Meeting Scheduler & Coordinator Agent** - https://github.com/topics/scheduling-assistant
11. **AI Travel Planning Agent** - https://github.com/topics/travel-planner
12. **Legal Document Analysis Agent** - https://github.com/topics/document-analysis
13. **Healthcare Diagnosis Assistant Agent** - https://github.com/topics/medical-ai
14. **Supply Chain Optimization Agent** - https://github.com/topics/supply-chain-optimization
15. **Email Management & Response Agent** - https://github.com/topics/email-automation

2. Large Language Models (LLMs) & RAG (12 Projects)

16. **Domain-Specific Chatbot with RAG** - https://github.com/langchain-ai/langchain
17. **Intelligent Code Documentation Generator** - https://github.com/topics/code-documentation
18. **PDF Question-Answering System** - https://github.com/topics/pdf-qa
19. **Enterprise Knowledge Base Chatbot** - https://github.com/hwchase17/chroma-langchain
20. **Legal Contract Analyzer** - https://github.com/topics/contract-analysis
21. **Academic Paper Summarizer** - https://github.com/topics/paper-summarization
22. **Multi-Document Retrieval System** - https://github.com/topics/information-retrieval
23. **Custom LLM Fine-tuning Platform** - https://github.com/huggingface/peft
24. **Prompt Engineering & Testing Toolkit** - https://github.com/topics/prompt-engineering
25. **AI Code Assistant with Codebase Context** - https://github.com/getcursor/cursor
26. **Conversational SQL Query Generator** - https://github.com/topics/text-to-sql
27. **Multi-Language Document Translator** - https://github.com/topics/machine-translation

3. Generative AI & Multimodal AI (15 Projects)

28. **Text-to-Video Generation System** - https://github.com/Stability-AI/generative-models
29. **AI Image Editor with Natural Language** - https://github.com/lllyasviel/ControlNet
30. **Voice-to-Video Avatar Generator** - https://github.com/topics/talking-head
31. **Multimodal Document Understanding** - https://github.com/unstructured-io/unstructured
32. **AI Music Generator from Text/Images** - https://github.com/facebookresearch/audiocraft
33. **Video Summarization with Audio Analysis** - https://github.com/topics/video-summarization
34. **Text-to-3D Model Generator** - https://github.com/topics/text-to-3d
35. **AI Comic Book Creator** - https://github.com/topics/comic-generation
36. **Smart Presentation Builder** - https://github.com/topics/ai-presentation
37. **AI Voice Cloning System** - https://github.com/topics/voice-cloning
38. **Image-to-Image Translation** - https://github.com/topics/image-translation
39. **AI Art Style Transfer** - https://github.com/topics/style-transfer
40. **Automated Video Editing Assistant** - https://github.com/topics/video-editing
41. **AI-Powered Story Generator** - https://github.com/topics/story-generation
42. **Personalized AI Avatar Creator** - https://github.com/topics/avatar-generation

4. Computer Vision & Image Processing (15 Projects)

43. **Real-time Object Detection & Tracking** - https://github.com/ultralytics/ultralytics
44. **3D Human Pose Estimation** - https://github.com/topics/3d-pose-estimation
45. **Medical Image Segmentation System** - https://github.com/topics/medical-image-segmentation
46. **Deepfake Detection & Analysis** - https://github.com/topics/deepfake-detection
47. **Virtual Try-On Fashion System** - https://github.com/topics/virtual-try-on
48. **Advanced OCR with Layout Understanding** - https://github.com/PaddlePaddle/PaddleOCR
49. **Gesture Control Interface** - https://github.com/google/mediapipe
50. **Autonomous Drone Navigation** - https://github.com/topics/drone-navigation
51. **Image Quality Assessment Tool** - https://github.com/topics/image-quality
52. **AR Interior Design Application** - https://github.com/topics/ar-interior-design
53. **Wildlife Monitoring & Identification** - https://github.com/topics/wildlife-detection
54. **License Plate Recognition System** - https://github.com/openalpr/openalpr
55. **Emotion Detection from Faces** - https://github.com/topics/emotion-detection
56. **Document Scanner & Digitizer** - https://github.com/topics/document-scanner
57. **Smart Video Surveillance System** - https://github.com/topics/video-surveillance

5. Natural Language Processing (12 Projects)

58. **Multilingual Real-time Translation** - https://github.com/facebookresearch/seamless_communication
59. **Fake News Detection with Context Analysis** - https://github.com/topics/misinformation-detection
60. **Advanced Sentiment Analysis Platform** - https://github.com/topics/sentiment-analysis
61. **Named Entity Recognition & Extraction** - https://github.com/explosion/spaCy
62. **Automated Essay Grading System** - https://github.com/topics/essay-scoring
63. **Speech-to-Speech Translation** - https://github.com/topics/speech-translation
64. **Context-Aware Smart Autocomplete** - https://github.com/topics/autocomplete
65. **Meeting Transcription & Insights** - https://github.com/openai/whisper
66. **Content Moderation System** - https://github.com/topics/content-moderation
67. **Question Answering System** - https://github.com/topics/question-answering
68. **Text Classification & Categorization** - https://github.com/topics/text-classification
69. **Dialogue System & Conversational AI** - https://github.com/topics/dialogue-system

6. Recommendation Systems & Personalization (8 Projects)

70. **Movie/Content Recommendation Engine** - https://github.com/NicolasHug/Surprise
71. **E-commerce Product Recommender** - https://github.com/topics/recommendation-system
72. **Music Playlist Generator** - https://github.com/topics/music-recommendation
73. **News Article Recommender** - https://github.com/topics/news-recommendation
74. **Job Matching System** - https://github.com/topics/job-recommendation
75. **Restaurant & Food Recommender** - https://github.com/topics/food-recommendation
76. **Course & Learning Path Recommender** - https://github.com/topics/course-recommendation
77. **Personalized Marketing System** - https://github.com/topics/personalization

7. Reinforcement Learning & Game AI (8 Projects)

78. **AI Game Playing Agent** - https://github.com/openai/gym
79. **Self-Learning Chess Engine** - https://github.com/official-stockfish/Stockfish
80. **Autonomous Robot Navigation** - https://github.com/topics/robot-navigation
81. **Trading Bot with RL** - https://github.com/topics/trading-bot
82. **Traffic Signal Optimization** - https://github.com/topics/traffic-optimization
83. **Resource Allocation System** - https://github.com/topics/resource-optimization
84. **Dynamic Pricing Engine** - https://github.com/topics/dynamic-pricing
85. **Multi-Agent Simulation** - https://github.com/topics/multi-agent-system

8. Full-Stack Web Applications (12 Projects)

86. **AI-Powered E-commerce Platform** - https://github.com/medusajs/medusa
87. **Social Media Dashboard with Analytics** - https://github.com/topics/social-media-dashboard
88. **Online Learning Management System** - https://github.com/moodle/moodle
89. **Real-time Collaboration Platform** - https://github.com/socketio/socket.io
90. **Headless CMS with AI Features** - https://github.com/strapi/strapi
91. **Job Portal with AI Matching** - https://github.com/topics/job-portal
92. **Food Delivery & Management System** - https://github.com/topics/food-delivery
93. **Smart Expense Tracker** - https://github.com/topics/expense-tracker
94. **Portfolio Builder with AI Templates** - https://github.com/topics/portfolio-website
95. **Event Management Platform** - https://github.com/topics/event-management
96. **Video Streaming Platform** - https://github.com/topics/video-streaming
97. **Hotel Booking System** - https://github.com/topics/booking-system

9. Mobile App Development (10 Projects)

98. **AI Fitness Tracking App** - https://github.com/topics/fitness-tracker
99. **Smart Note-Taking with Voice** - https://github.com/topics/note-taking-app
100. **Weather Forecast with ML** - https://github.com/topics/weather-app
101. **Language Learning with AI Tutor** - https://github.com/duolingo/duolingo
102. **Personal Budget Manager** - https://github.com/topics/budget-app
103. **Recipe Finder with Image Recognition** - https://github.com/topics/recipe-app
104. **Music Player with AI Recommendations** - https://github.com/topics/music-player
105. **Task Manager with Smart Scheduling** - https://github.com/topics/todo-app
106. **AR Navigation App** - https://github.com/topics/maps
107. **Smart QR Code Scanner** - https://github.com/zxing/zxing

10. Cybersecurity with AI (10 Projects)

108. **AI-Powered Threat Detection** - https://github.com/topics/threat-detection
109. **Phishing Email Classifier** - https://github.com/topics/phishing-detection
110. **Ransomware Detection System** - https://github.com/topics/ransomware-detection
111. **Network Traffic Analyzer** - https://github.com/topics/network-monitoring
112. **Zero-Trust Security Platform** - https://github.com/topics/zero-trust
113. **Vulnerability Assessment Tool** - https://github.com/topics/security-scanning
114. **Encrypted Messaging App** - https://github.com/signalapp/Signal-Desktop
115. **Biometric Authentication System** - https://github.com/topics/biometric-authentication
116. **Password Manager with AI Security** - https://github.com/bitwarden/server
117. **Intrusion Detection with ML** - https://github.com/topics/intrusion-detection

11. Blockchain & Web3 (8 Projects)

118. **AI-Powered NFT Generator** - https://github.com/topics/nft-generator
119. **Decentralized AI Model Marketplace** - https://github.com/topics/ai-marketplace
120. **Smart Contract Security Auditor** - https://github.com/topics/smart-contract-security
121. **DeFi Yield Optimizer** - https://github.com/topics/defi-optimization
122. **Blockchain Voting System** - https://github.com/topics/blockchain-voting
123. **Crypto Portfolio Tracker** - https://github.com/topics/crypto-portfolio
124. **NFT Marketplace Platform** - https://github.com/topics/nft-marketplace
125. **Decentralized Storage System** - https://github.com/ipfs/kubo

12. Data Science & MLOps (10 Projects)

126. **Automated ML Pipeline** - https://github.com/mlflow/mlflow
127. **Model Monitoring Dashboard** - https://github.com/evidentlyai/evidently
128. **Feature Store Implementation** - https://github.com/feast-dev/feast
129. **A/B Testing Platform** - https://github.com/topics/ab-testing
130. **Real-time Analytics Dashboard** - https://github.com/apache/superset
131. **Customer Churn Prediction** - https://github.com/topics/churn-prediction
132. **Time Series Forecasting System** - https://github.com/facebook/prophet
133. **Data Quality Monitoring Tool** - https://github.com/great-expectations/great_expectations
134. **Fraud Detection System** - https://github.com/topics/fraud-detection
135. **Customer Segmentation Platform** - https://github.com/topics/customer-segmentation

13. IoT & Edge AI (10 Projects)

136. **Smart Home Automation System** - https://github.com/home-assistant/core
137. **Edge AI Camera System** - https://github.com/topics/edge-computing
138. **Predictive Maintenance Platform** - https://github.com/topics/predictive-maintenance
139. **Smart Agriculture with Sensors** - https://github.com/topics/precision-agriculture
140. **Wearable Health Monitoring** - https://github.com/topics/health-monitoring
141. **Energy Management System** - https://github.com/topics/energy-optimization
142. **Smart Traffic Management** - https://github.com/topics/traffic-management
143. **Industrial Anomaly Detection** - https://github.com/topics/anomaly-detection
144. **Smart Retail Analytics** - https://github.com/topics/retail-analytics
145. **Environmental Monitoring IoT** - https://github.com/topics/environmental-sensing

14. Cloud Native & DevOps (8 Projects)

146. **Kubernetes Operator Development** - https://github.com/operator-framework/operator-sdk
147. **CI/CD Pipeline with AI Testing** - https://github.com/topics/continuous-integration
148. **Infrastructure Monitoring System** - https://github.com/prometheus/prometheus
149. **Serverless Application Framework** - https://github.com/serverless/serverless
150. **Container Security Scanner** - https://github.com/aquasecurity/trivy
151. **GitOps Automation Tool** - https://github.com/argoproj/argo-cd
152. **Log Aggregation System** - https://github.com/elastic/elasticsearch
153. **API Gateway with Rate Limiting** - https://github.com/Kong/kong

15. Advanced & Research Projects (12 Projects)

154. **Quantum Machine Learning** - https://github.com/PennyLaneAI/pennylane
155. **Federated Learning System** - https://github.com/FederatedAI/FATE
156. **Neural Architecture Search** - https://github.com/microsoft/nni
157. **Neuromorphic Computing Simulation** - https://github.com/topics/neuromorphic-computing
158. **Brain-Computer Interface** - https://github.com/topics/brain-computer-interface
159. **Digital Twin System** - https://github.com/topics/digital-twin
160. **Graph Neural Network Application** - https://github.com/pyg-team/pytorch_geometric
161. **Meta-Learning Framework** - https://github.com/topics/meta-learning
162. **Explainable AI (XAI) Dashboard** - https://github.com/slundberg/shap
163. **AI Ethics & Bias Detection** - https://github.com/topics/ai-fairness
164. **Homomorphic Encryption System** - https://github.com/topics/homomorphic-encryption
165. **Swarm Intelligence Application** - https://github.com/topics/swarm-intelligence

16. Game Development (5 Projects)

166. **AI-Powered 2D Platformer** - https://github.com/topics/platformer-game
167. **Procedural Content Generation Game** - https://github.com/topics/procedural-generation
168. **Multiplayer Battle Royale** - https://github.com/topics/multiplayer-game
169. **Educational VR Game** - https://github.com/topics/vr-game
170. **Mobile Puzzle Game with AI** - https://github.com/godotengine/godot
